

Ultraview SL2800

Spacelabs Healthcare - Connecting Innovation with Care

Spacelabs Healthcare is fully committed to making strong connections: between clinicians and their patients; between technological innovations and real-life patient care; between clinical needs and cost-efficient solutions. We are a dynamic company with decades of experience providing innovative products and services to healthcare professionals.

Our goals are simple:

Keep it easy to use, focus on system flexibility and scalability, and provide access to information anytime, anywhere. The result will continue to fulfill your greatest need: more time to care for your patients.

Flexible Monitoring for Every Care Area

Bringing superior monitoring performance and patient information efficiencies to the most demanding care areas, the Ultraview SL™2800 offers complete monitoring and workstation performance in a single bedside package. In addition, the SL2800 delivers charting, lab, intranet and HIS applications to the bedside. With WinDNA®, it's easy to create concise and complete electronic patient records and review information from multiple sources without leaving the patient.

The SL2800 supports the most demanding care areas using a medical grade, touchscreen, color LCD. Basic configuration provides 6 waveforms and up to 18 parameters. WinDNA is standard.

Advantages

Superior network solutions deliver instant access to patient information.

- WinDNA for delivering charting, lab, Internet, intranet and HIS applications to the bedside
- Remotely view, control, review and record patient data for any other networked or telemetry bed without leaving the patient
- Configurable patient ID
- Full Bed Review

Consistency and flexibility for superior ease of use and optimal performance in any care environment.

- Intuitive touchscreen menu structure across all Spacelabs products
- Default alarm limits and customizable parameter settings
- Modular, scalable architecture
- Compatible with Ultraview®, Ultraview SL and PCMS™ monitors and modules
- Easily upgraded and/or maintained in the field

Integrated alarm management solutions to streamline event notifications and documentation.

- Alarm Limit Review provides a printable summary of alarm limits for all active parameters
- Flexport® system interfaces link alarms from standalone devices
- Tone Access controls
- Alarm Watch delivers bed-to-bed and bed-to-central alarm notification

Information management solutions help build a concise patient record.

- Barcode scanner support
- Flexport system interfaces
- Data Shuttle® option provides a seamless transfer of patient data between monitors, ensuring that information always stays with the patient
- HL7 interfaces to HIS applications

Ultraview SL2800

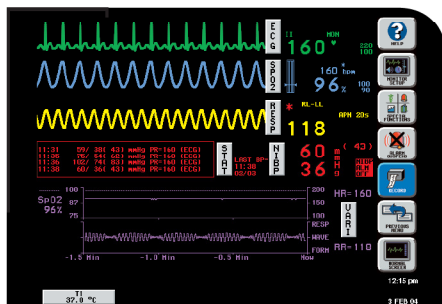

Advanced cardiac monitoring without additional equipment

- Continuous 12-lead ST segment monitoring
- Dual-lead arrhythmia analysis and trending
- Diagnostic-quality, 12-lead ECG reports with optional interpretation package

Flexport system interfaces extend the reach of patient care to standalone devices

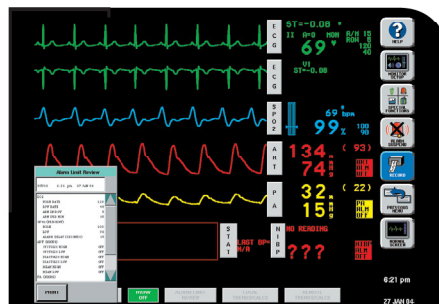

- Consolidate waveforms, data and alarms at the bedside and central
- Integrate information directly into the monitor trends for output to HIS and CIS applications
- Provide view, control, review and recording of patient information across the network

Varitrend® 3 OCRG for neonatal event review

- Combines HR, SpO₂ and respiration trends into a single graph
- User-definable events for quick assessment of clinical changes

A variety of mounting solutions provided by GCX Corporation makes it easy to use the SL2800 in different care areas.

Alarm Limit Review

- View or print all current alarm settings

Parameter Module Solutions

Ultraview SL Command Module

Parameter Set	ECG	NIBP	TEMP	IP	CO	SpO ₂
 91496-A Noninvasive Set	✓	✓	2	–	–	Comprehensive SpO ₂ Options
 91496-B Invasive Set	✓	✓	2	2	–	
 91496-C Invasive Set with CO	✓	✓	2	4	✓	
 91496-I Noninvasive Set without ECG	–	✓	2	–	–	

Options – SL Command Module:

- Three levels of arrhythmia:
 - Basic
 - Standard Multiview™ (MVI)
 - Advanced Multiview (MVII)
- Diagnostic 12-lead ECG
 - With measurement & interpretation
 - Without measurement & interpretation
- ST segment analysis
- MasimoSET, Spacelabs or Nellcor OxiMax SpO₂
- Respiration
- Varitrend® 3 OCRG

Specialty Modules:

- 90449 Bedside Recorder
- 91482 BISx™
- 90481 EEG
- 91517 Capnograph
- 91518 Multigas Analyzer
- 90478 TM Receiver

Network

The Spacelabs monitoring network supports seamless data acquisition and exchange across the enterprise, addressing the clinician's need for continuous information management.

Available accessories include:

- Flexport interfaces to standalone devices
- Remote keypad
- External nurse alarm light
- GCX mounting and mobility solutions

Options

- Perioperative Software
- Data Shuttle
- Drug Dose Calculations
- Vital Sign Calculations
- Full Bed Review (FBR)
- Full View ECG Display
- Patient Data Logger™ (PDL)

Supplies and Accessories

High-quality supplies and accessories are important for monitoring system performance and for economical and efficient patient care. All Spacelabs supplies and accessories are carefully designed and tested to guarantee optimal system performance.
